

KNOWLEDGE

- To make an eye catching poster
- To advertise elements of a residential

SKILL / DISPOSITION

- Collaborative working
 - High quality communication
 - Decision making

Camp Junior 2 Senior - Group Challenge C

The Setting

Transition to secondary school can feel a bit scary for lots of children. Camp Junior 2 Senior was planned by staff and students to help you get to know each other in a fun setting. You have now taken part in the camp residential - we hope you had a really good time and met some great new friends! We would now like your help to plan the camp for next year's Year 6 students.

The Challenge

Your challenge is to produce a poster that can advertise the camp to next year's Year 6 students. Your poster should be bright and eye-catching and must, of course, be high quality. It is really important that the poster shows the activities you took part in at your residential along with information or pictures showing the skills you learned and the opportunities you had to make new friends. It would be great if the poster could also show how learning in school can be similar to learning out of school. Have fun!

Success Criteria

- All tent team members must be involved in making the poster
- The poster should be A3 size
- The poster must be high quality and colourful
- The poster should show the activities available at the camp
- The poster should show the skills you learned and the chances you had to make friends
- The poster should also show how learning in and out of school are linked.
